Together. 

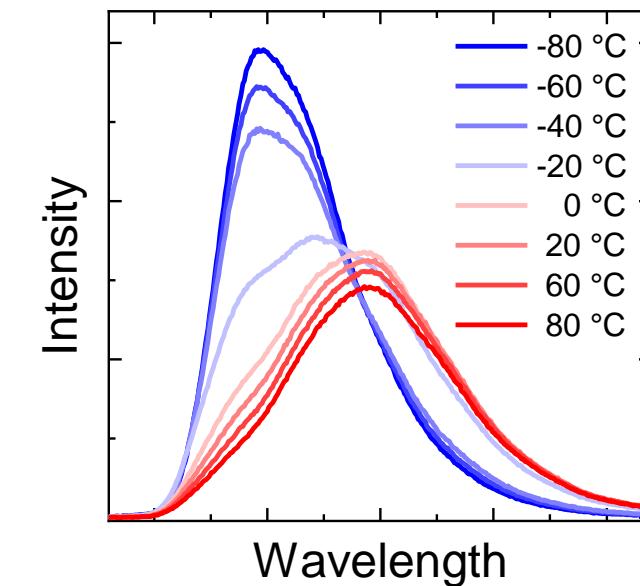

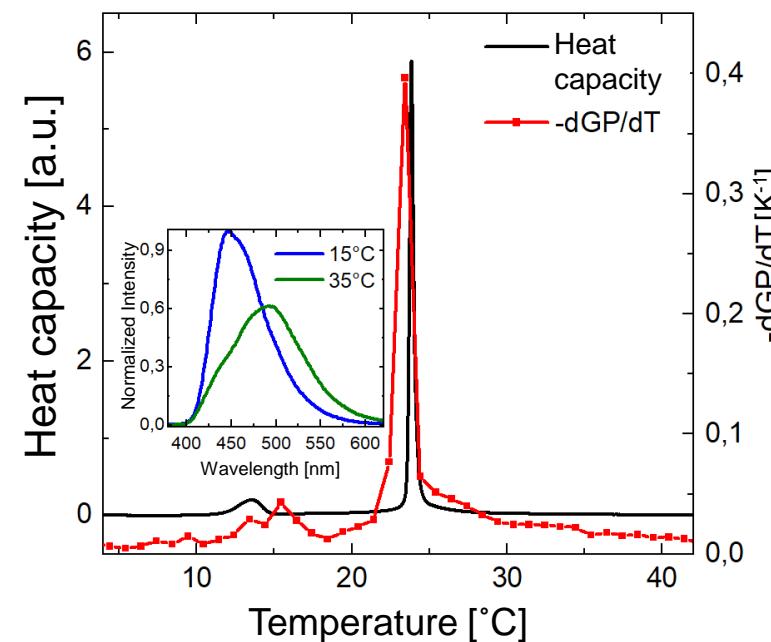

Technique

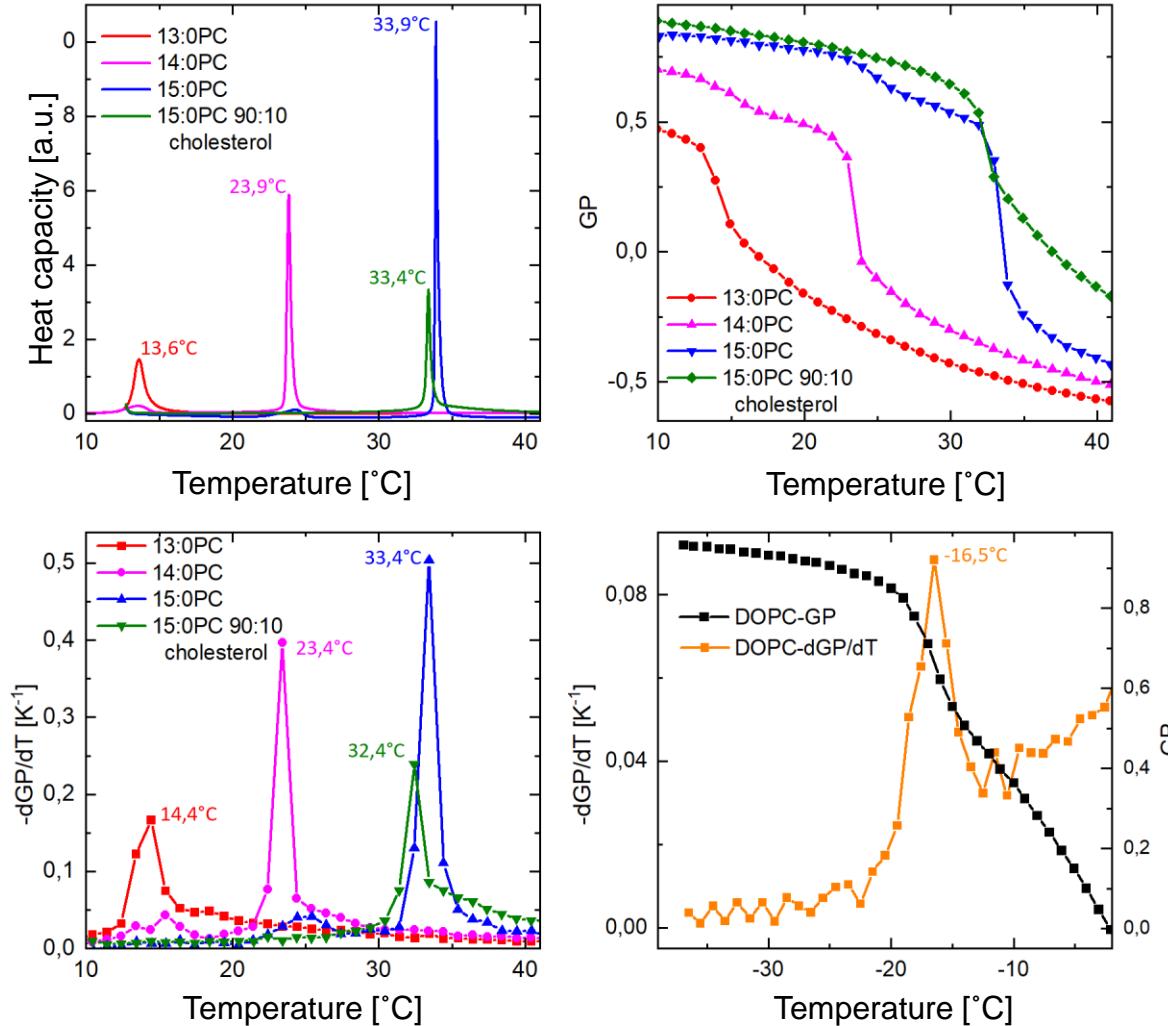

$$GP = \frac{I_{440\text{nm}} - I_{490\text{nm}}}{I_{440\text{nm}} + I_{490\text{nm}}}$$

GP > 0: High lipid order

GP < 0: Low lipid order

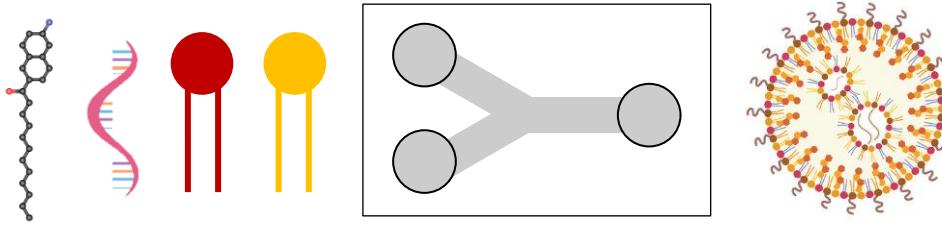

Liposome analysis

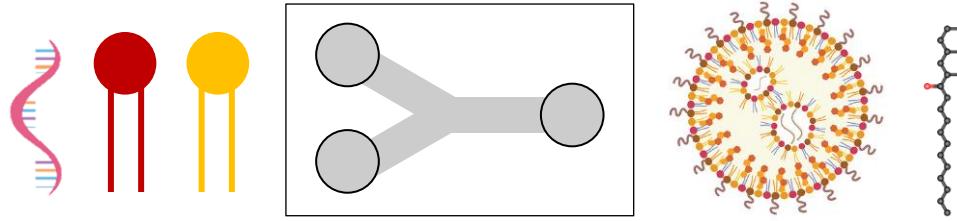

Sample preparation and application

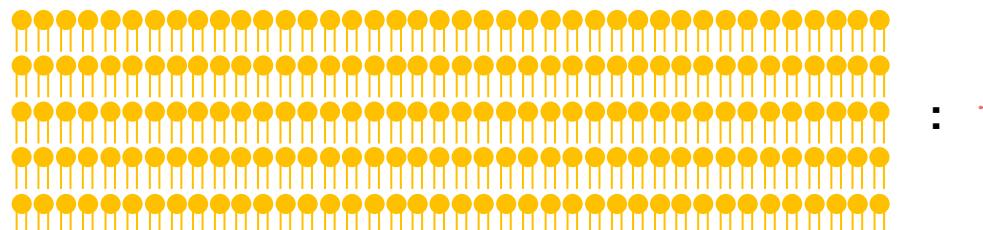

Laurdan in lipid phase **PRIOR** to synthesis

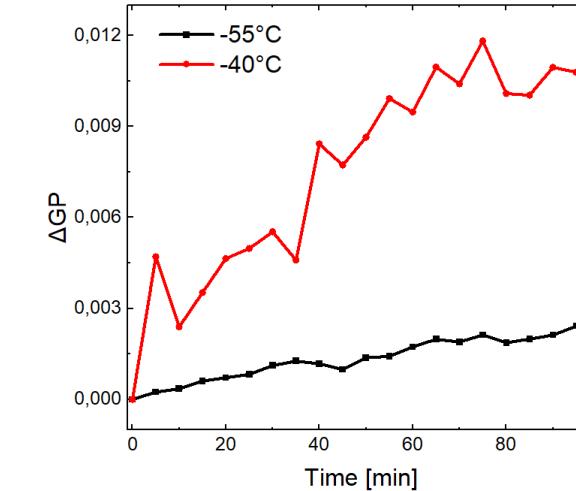

Incubation with Laurdan in DMSO **AFTER** synthesis

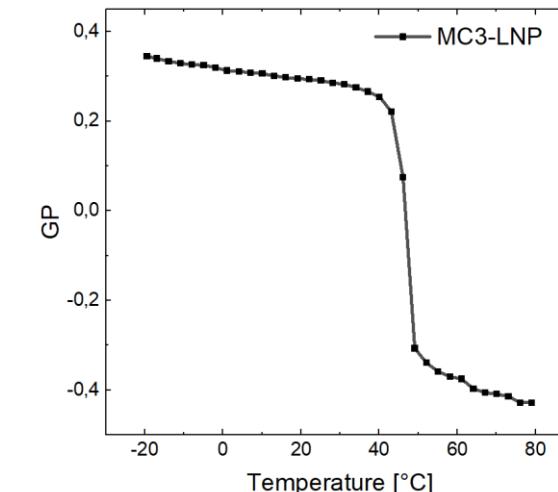

200 Lipids : 1 Laurdan

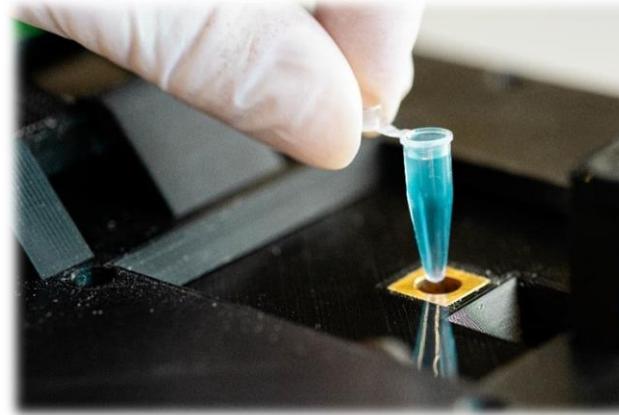

In-situ cold storage studies

Phase transition analysis

LISO – Lipid state observer

Join the LISO-Project any time as collaborator and get access to:

- Broad temperature range
- High temperature precision
- Easy handling and data analysis
- Small sample volume: 260 µL
- Lipid concentration: 0.05 – 5 mg/mL

Get ready for the MVP in March 2025

- CE certified
- State of the art measurement software
- Improved housing, cooling system, sample holder, multiple fluorescent probes, ...
